

UNIVERSAL SCREEN MAGAZINE.

The making of ice-cream in a large plant, under the rigid supervision of the Board of Health, begins Issue No. 25 of the Screen Magazine. Then comes a series of views of the proper testing of seed corn, as it is carried out at the New York College of Agriculture at Cornell University. Only the ears which show strong, healthful germination are selected for planting. The subject of preparedness is represented by a demonstration of the making of armor plate for our battleships and cruisers. Science is taken up in a series of views of the teaching of deaf mutes to talk, as it is conducted in the Institute for the Improved Instruction of Deaf Mutes in New York City.

The reel ends with a clay cartoon by Willie Hopkins, the Screen Magazine's sculptor, called "The Spirit of '76 in Every Man."
